FACE MASK DETECTION

Businesses and organizations are exploring ways to re-open while safeguarding the health and safety of their staff and visitors. Wearing a face mask can provide much needed protection against the spread of COVID-19, and has been adopted as a precautionary measure in many workplaces. Individuals not complying can be detected using video analytics onboard the Wisenet X Series cameras.

SPECIAL OFFER - \$1,999!

Babcon Electric is now offering a special price for the Face Mask Detection Camera hardware, software, and installation! *

Price includes:

- 1 face mask detection camera at 1 entrance
- data cabling
- camera software license, and programming.

Find out more at www.babconelectric.com

*Customer must have a designated workstation (not provided by us) with a hard wired internet connection for us to install the software on. Price includes only up to 200' of data cable and installation. Camera price includes a basic ceiling mount only, any special mounts are not included.

BENEFITS

- Detect individuals not wearing or incorrectly wearing a face mask on premises
- Simultaneously detects up to 4 people
- Keep your staff and visitors safe
- Audio messages can be delivered automatically to staff/visitors requesting them to wear a face mask
- Highly accurate face mask detection solution, not affected by hat, glasses or head scarf
